

How Can “The Windfall System” Make My Record Storage Experience Better.

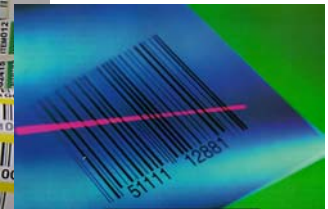

Less Paperwork / Timely Reports

Windfall is a bar coded software system built specifically for the moving and storage industry. All customer information is entered into the system through portable data collection devices, scanning bar codes, and importing. This means that you can be supplied with electronic reports in different formats (Excel, Word, ASCII, Lotus, Access, Etc.) for all your record storage.

Bar Code Tracking

Locations in the warehouse, inventory tags, work orders, and scan sheets are utilized by the mover to expedite record storage activity. This in turn gives you assurance that your boxes or files are being tracked in great detail through their entire life within the warehouse. Plus, the process is being expedited through the use of automation.

Customer Internet Access

Now you have the ability to see inside the warehouse and work with your data on-line. By logging on to your secure designated site through a User ID and Password, record storage information can be at your fingertips to view, sort, filter, report on and create Work or Service Orders.

Summary: What It Means To You!

Less Paperwork / Timely Reports

- Eliminate filtering through multiple handwritten, outdated reports.
- Receive timely, legible reports in an electronic format.
- Generate reports suitable for management meetings, record or file verification, and box management.

Bar Code Tracking

- Ensure greater accuracy in tracking your records.
- Complete "piece level tracking"™ for your records life in the warehouse.
- Provides a full file and/or box location system for fast retrieval of your product.

Customer Data Collection Profile

- Creation of a unique profile which allows warehouse staff to capture only the information you need.
- Ability to track your records according to your cost centers.
- Consistency is insured through data collection devices which prompt users through inventory.

Bar Code Readability

- Cross reference product in the our system using your existing record management numbers.
- Save time and insure accuracy by being able to read existing tags on product.

Digital Imaging

- Eliminate the delivery of wrong product by seeing it before you receive it.
- Identify difficult to describe items easily.
- Save time, money and aggravation.

Customer Internet Access

- View your inventory on line 24/7.
- Eliminate phone calls by always having the most recent data available at your fingertips.
- Run reports and place work orders at your convenience.
- View the most current, accurate data available.
- Impress your staff and managers with real-time product inventories and reports.
- Ensure security through User ID and Password access.
